

Brake engineering & testing services

IDIADA's brake systems section is an engineering partner to the automotive industry, providing **complete solutions for brake development projects worldwide.**

DESIGN • SIMULATION • ELECTRONICS • TESTING

BRAKE DESIGN ENGINEERING

OEM oriented design conception with leading competences for full vehicle development projects.

- Brakes dimensioning calculations
- Initial packaging studies
- Concept design sheets
- Component definition
- BOM management
- Supplier management
- Target setting and verification
- Final sign-off
- Product life quality maintenance

BRAKE ELECTRONIC INTEGRATION

- Brake redundancy concept study for CAVs
- Support in brake logic actuation for Brake-by-Wire systems
- Turn key projects for brake electronic integration

BRAKE PERFORMANCE MANAGEMENT

State-of-the-art tools and facilities to conduct complete test programmes at component and vehicle level.

BRAKE BENCHMARKING

VIRTUAL DEVELOPMENT

- Thermo-mechanical analysis
- CFD analysis
- NVH analysis

BRAKE TESTING ACTIVITIES

- Brake dynamometer testing
- Brake performance testing in PG
- Brake thermal validation in PG
- Advanced brake NVH support
- On-road brake durability
- Electronic brake control

GLOBAL PRESENCE

- Project management
- Integration of design, simulation and testing
- Design led by functionality
- Strong international presence

- HEADQUARTERS & TECHNICAL CENTRE
- PERMANENT BASE FOR BRAKE ENGINEERING & TESTING
- BRAKE DYNAMOMETER LABORATORY

CONTACT INFORMATION

Headquarters & Technical Centre · L'Albornar - PO Box 20 · E-43710 Santa Oliva (Tarragona) Spain
