

IRIS - IDIADA's Regulatory Information System

IRIS is a Regulatory Technical Knowledge service that provides accurate, structured, and customized information through an online dynamic smart platform. IRIS allows access to IDIADA type approval experts' knowledge of current and forthcoming Regulations for motor vehicles at international level.

To keep you updated on actual and upcoming worldwide Regulations, IRIS provides 3 main services:

IRIS REGULATORY KNOWLEDGE BASE

IRIS Regulatory Knowledge Base is much more than a database for accumulating documents and Regulations, IRIS is a source of well-structured technical knowledge where you will find:

- Accurate regulatory information
- Permanent access to international updated legislation
- Latest amendments and consolidated versions of the regulations
- First-hand interpretations. IDIADA's technical experts assist to European Commission and UNECE working group meetings to participate in the rule-making process

- Relevant proposals issued by regulatory working groups and official bodies
- Powerful Technical Attributes tool that makes comparisons between tests with similar typologies, previously defined as comparable, between different markets

IRIS offers permanent access to worldwide legislation with an organized structure with the possibility of getting flexible results through powerful tools.

"The right knowledge for the right people at the right time"

Permanent access to **more than 2,000** up-to-date worldwide regulations

Technical Attributes **Comparative Tool**
